

1 Intro

The following charts show the current progress and general program flow. Green is done, yellow is partial, and red hasn't been started. The program flow will likely change a large amount as things stop working and we see better ways of doing it.

2 Control Flow

3 Messaging

The following is even more likely to change.

A source is only allowed to modify its own assets and playlists. A given source has two locations where it can store data. The first is the oneshot location. After a oneshot playlist finishes, it is removed. Assets will remain. A repeat playlist stays around and is repeated after finishing. A repeat asset stays around as well.
